

# Safe & flexible support

**Our new series of ceiling support series has been designed to safely and securely suspend every size of MILOS aluminium truss. Thanks to their low headroom, extreme durability, and flexibility (can be used both above and below trusses), all of your requirements for overhead hanging of your truss are met.**

- Low headroom
- Extremely durable
- Can be used in both the up and down positions
- Comply with DGUV 17 for supporting loads above people
- CE certified in accordance with machine directive 2006/42/EC
