

Roll your truss

The new truss dolly and carrier from Milos make moving your truss from the truck to the installation area, and back again, easy and convenient.

The innovative, universal design and placement of the durable rubber holders on the truss carrier allow it to hold both quatro and trio formats of M290 and M390 series truss. Constructed from aluminium, the dolly features channels for attaching ratchet straps. Due to the dolly's 800 x 600 mm dimensions, it fits in most trucks. When not in use, the empty dollies stack on top of each other to save space.

Truss insert

- Strong and durable rubber holders
- Fits quatro and trio truss from the M290 & M390 series
- Rubber holders are mounted on an aluminium bar

Truss dolly

- Stacking capacity up to 6 levels of truss
- Grooves for securing ratchet straps
- Dimensions: 800 x 600 mm
- 2 regular wheels and 2 wheels with brakes (each wheel has a 100 kg loading capacity)
- Made from aluminium
- Custom size dollies available on request
